

BRASSIES Women's Golf Association

This association started in the North Central Florida area in 1980. One tournament per month is held from September through May. Current dues are \$40.00 annually per individual member.

Membership in Brassies is limited to women with a current 23.0 GHIN handicap index or lower, as demonstrated by the last 16 GHIN indexes remaining at or below 23.0 before acceptance into Brassies. She must belong to an 18-hole LGA on a golf course whose Club Pro is willing to host the Brassies at least once every 2 years. The course must have enough golf carts to accommodate up to 88 competitors. The maximum number of competitors is 100. The Head Pro or Club Manager must sign this form indicating the club's agreement to the following terms:

The tournament entry fee will pay for reasonable greens fee and cart. Entry fees are set by the contract between the Club Manager or Head Pro and the Brassies WGA. **An optional modest lunch for purchase for the competitors following play may be offered at the competitor's expense.** Additionally, the Brassies Treasurer will issue a check to the Pro Shop for the total prize awards in pro shop credit, provided there is sufficient merchandise for women available and depending on the size of the field.

The designated club delegate will be contacted when it is the club's turn to host a tournament. She and her committee will arrange the details with Club Manager or Head Pro. At least one member of the club must be a Brassie member for the club to participate.

I agree to host a Brassies tournament under the above terms at least once every 2 years.
